SKILLS

- C | Python | Java | OOP | MySQL | Firebase | MongoDB | Python for Data Science | Data Structures | Algorithms
- HTML | CSS | Javascript | React JS | React Native | Expo CLI | Java for Android Development | NodeJs | API
- React-Bootstrap | Tailwind CSS | Frontend Development | Figma Wireframing | UX/UI Design | HCI Concepts

EXPERIENCE

DLSU-COMET (Center for Complexity and Emerging Technologies)

Sept. 2022 - August 2023

Research Collaborator

Engaged in Human-Computer Interaction (HCI) research since my college thesis. Contribute to ongoing research, analyze data, conduct experiments, and evaluate user feedback. Gain valuable experience in rigorous research and data interpretation for user-centric interface development.

Converge ICT Solutions Inc.

July 2022 - Sept 2022

Devops3 Team Intern

Conducted Usability Research for website design best practices. Develop front-end copy of gofiber.com website applying the website design best practices Usability Research. Create Low-fidelity and High-fidelity design for the company's Employee Account Request Form. Create High-fidelity design and front-end side of the company's user tracker system.

DLSU-CSO (Council of Student Organizations)

2019 - 2020

Associate in Activity Processing & Screening (APS)

Managed approval processes for activities and proposals at DLSU-Manila, collaborating with organizations to ensure compliance with university policies.

PROJECTS

NFT Mini Marketplace Showcase Website for Mobile App

November 2023

 <https://nft-app-showcase-jgrl.netlify.app/>

React JS website that showcases a mobile application developed using React Native for managing and interacting with NFTs. The project includes the use of React, Vite, and JavaScript to provide a smooth and responsive user experience for the website. Created the mockups seen on the website using figma

React Native Movie App

October 2023

 [IOS QR Code for Expo Go App](#)

 [Android QR Code for Expo Go App](#)

React Native Movie App Project allows users to explore and discover information about movies using React Native and Expo. This application is built with TMDB API to show the data of the movies, cast, and tv shows.

Realtime Crypto Price Tracker

October 2023

 [IOS Link with Expo Go App](#)

 [Android Link with Expo Go App](#)

React Native Crypto Price Tracker is a mobile app project that enables users to track cryptocurrency prices with interactive charts, utilizing React Native and CoinGecko API for real-time data.

GoFiber.ph Frontend UI Copy

August 2022

 [gofiber-frontend-ui-copy](#)

This project is a frontend replica of the Converge GoFiber.ph website, showcasing an enhanced user interface built with React.js and React Bootstrap. It was developed as part of an internship project to demonstrate frontend development skills with the use of React JS.
